

**SURRY-YADKIN ELECTRIC MEMBERSHIP CORPORATION**  
**DOBSON, NORTH CAROLINA**  
**RATE RIDER LRG**  
**Large Renewable Generation Rider**

**AVAILABILITY**

This Rider is available only to members located in the Cooperative's service territory who have an Eligible Qualifying Facility interconnected directly with the Cooperative's system and who have contracted to sell all the generator's capacity and energy to the Cooperative. In order to be considered an Eligible Qualifying Facility, under this Rider, the generator must be hydroelectric or fueled by trash or methane derived from landfills, hog waste, or poultry waste, non-animal biomass, solar, or wind and meets the definition of a Qualifying Facility as defined by the Federal Energy Regulatory Commission's (FERC) Order No. 70 under Docket RM79-54. The size of a Renewable Generator contracting to sell all their capacity and energy under this Rider shall be greater than 25 kW. The maximum size of a generator interconnected to the Cooperative's system shall, however, be limited by the impact the generator will have on the Cooperative's system based upon its location on the system and the results of an Engineering Study commissioned by the Cooperative and paid for by the consumer.

Service necessary for the delivery of the consumer's power into the Cooperative's system under this schedule shall be furnished solely to the individual contracting consumer in a single enterprise, located entirely on a single, contiguous premise. Prior to receiving service under this schedule the consumer must have a signed "Standard Interconnection Agreement" between the consumer and the Cooperative.

The obligations of the Cooperative in regard to service under this schedule are dependent upon its securing and retaining all necessary rights-of-way, privileges, franchises, and permits for such service. The Cooperative shall not be liable to any consumer or applicant for power in the event it is delayed in, or is prevented from purchasing power by its failure to secure and retain such rights-of-way, rights, privileges, franchises, and permits. Consumers receiving service under this schedule must have their renewable generation registered with the North Carolina Utilities Commission prior to connecting to the Cooperative's system.

If the consumer requires supplemental, standby, or interruptible service, the consumer shall enter into a separate service agreement with the Cooperative in accordance to the Cooperative's applicable electric rates, riders, and established Service Rules and Regulations as filed with the North Carolina Utilities Commission.

**CHARACTER OF SERVICE**

Service shall be provided at one point of delivery through a single meter at one of the following voltages. Standard service shall be single-phase, 120/240 Volts, and 60 Hz. Three-phase service may be provided where available at 208/120 Volts or 480/277 Volts. Other voltages may be available with prior approval of the Cooperative.
